

## Jet CXV TurboDry®

Streamlined for high velocity airflow, fast drying and cleanup.

Aerodynamically designed for the highest velocity airflow at 3100 tested CFM – the Jet's built-in angles maximize the flow of turbulent air along the floor. Its focused vanes let you direct extra velocity exactly where you need it, and the unit's molded design offsets from the wall for optimizing the fastest wall and floor drying.

Along with powerful airflow and minimal amp draw, the Jet is significantly quieter thanks to the unit's double-walled construction. Quick stackability on the Unimover handtruck – make the transport of multiple Jets easy and convenient.

### Product Features

- Low amp draw - only 1.5, 2.0 or 3 amps depending on speed setting
- Daisy-chain up to 8 units (on low speed) using convenient onboard outlet
- Run 200 feet without an extension cord
- Built-in stand and non-skid rubber feet for safety.
- Quick convertible access for cleaning components
- Easy stacking for storage and transport
- Dri-Eaz legendary durability & reliability

### Product Specifications

Model	F367
Dimensions (H x D)	25.9 x 18.9 in.   65.8 x 48 cm
Power	1.5, 2.0, 3.0 amps, 115V
Speed	3 speed switch
Operating positions	2
Motor	0.25 HP
Weight	35 lbs   16 kg
Cord length	25 ft.   7.62 m
Construction	Rotomolded polyethylene shell
Stackable	Yes
Safety	ETL tested to UL/CSA Standards
