CLIMATE CONTROL

PORTABLE COOLING SOLUTIONS

BEAT THE HEAT! COOL DOWN YOUR WORKSPACE THIS SUMMER...

As the largest independent supplier of portable climate control in Canada, ICS Group proudly provides project-specific, portable COOLING solutions that address the particular needs of your site.

Our Application Specialists will design a portable COOLING solution that pairs the right process with the right environment. The result? You get all the "chilled" air you need from a solution that delivers maximum efficiency while keeping your project on-time and on-budget.

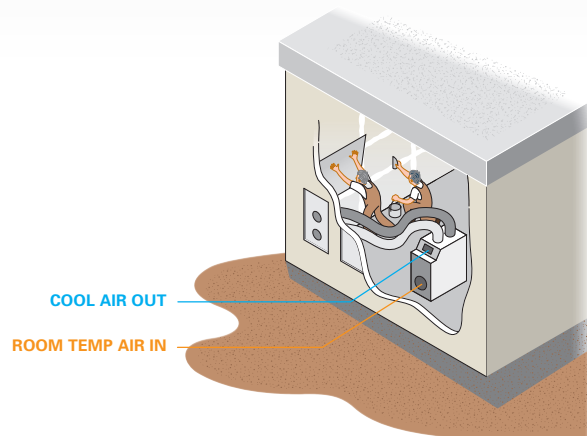

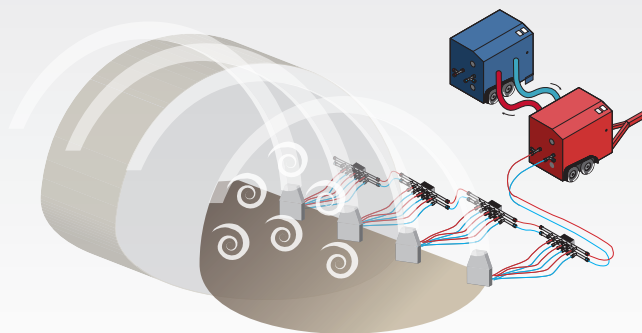

SOME OF THE MORE POPULAR COOLING APPLICATIONS INCLUDE:

Comfort / Productivity: Working on a closed-in Construction space can get hot! Heat from 'solar gain', coupled with a non-operational HVAC system, can wreak havoc with your construction team - morale suffers, safety is compromised, and productivity nose-dives. A portable COOLING solution from ICS Group will put the 'spring' back into your workers' step and move your project at the speed of efficiency.

Process Control Environments: Computer server rooms and other electrical assets need proper ventilation. But, this can be a real challenge when the building's permanent HVAC system is not yet online. In the interim, a portable COOLING solution from ICS Group will, both, protect the integrity of your hardware AND maintain its operating schedule.

Concrete Finishing / Curing: Problem - Your massive concrete pour is producing so much heat, it's not curing properly. Or, maybe the surface temperature of (already) cured concrete is too hot to apply a desired coating. What do you do? A tailored COOLING solution from ICS allows contractors to properly cure concrete and apply finishes that will perform to their maximum potential for life.

Outdoor Events: To get the most out of your events, your guests need to be comfortable. If you hit the mark, they'll notice - if you miss it, they'll really notice! A made-to-order COOLING solution from ICS Group offers your audience the freedom to fully embrace your outdoor event, enjoying all its aspects - in complete comfort.

LISTEN. DESIGN. DELIVER.

A Consultative Approach. A tailored solution that meets your objectives. 24/7/365 service. Beat the heat this summer with an ICS Group solution that keeps you "cool as a cucumber" and delivers your projects on-time and on-budget.
